Available for full-time positions and internships.

PROFESSIONAL SUMMARY

Systems Engineering student and backend developer passionate about technology and programming. I love turning ideas into real products that help people. Experienced in building REST APIs, databases and full-stack web applications with Python, Java and JavaScript. Curious, self-taught and team-oriented, I am a certified Scrum Master looking to join innovative teams where I can contribute, keep learning and grow as a software engineer.

WORK EXPERIENCE

Co-founder and CTO (Backend Developer)

SIMAV, road-condition intelligence startup | Ibagué, Colombia | Sep 2026 - Present

Technologies: Python, FastAPI, PostgreSQL, PostGIS, Supabase, React, Leaflet, Astro

- Lead developer of the backend REST API, built with Python and FastAPI using hexagonal architecture and geospatial queries on PostgreSQL/PostGIS.
- Implemented secure multi-tenant authentication (JWT, Argon2id password hashing, CSRF protection) and AI classification of road-damage photos with Google Gemini.
- Connected the React web dashboard to the API, including a live map of Ibagué, and deployed the system on Render and Vercel.

Backend Developer

ZyTime, scheduling SaaS | Oct 2026 - Present

Technologies: Java, Spring Boot, PostgreSQL, OpenAPI

- Developed the business configuration, team and availability modules that power the appointment booking system.

PROJECTS

Cartoon Pizza - Restaurant Management System | Node.js, Express, MongoDB, Socket.IO

Full-stack web application with real-time orders across waiter, kitchen and cashier screens, user roles, and sales reports.

Gold Deluxe - Inventory Reconciliation System | Python, Django, PostgreSQL

Material tracking and reconciliation system for a jewelry workshop, with audit trail and automated testing.

Evermoon - Discord Bot | JavaScript, discord.js, Supabase

Bilingual (English/Spanish) bot that gives couples a private space for letters, memories, dates and games.

IbgameApp - Android Tourism App | Kotlin, Android

Gamified tourism app for Ibagué with maps, routes, QR code check-ins and achievements.

SKILLS

Programming Languages: Python, JavaScript, Java, Kotlin, SQL, HTML, CSS

Frameworks and Libraries: FastAPI, Django, Spring Boot, Node.js, Express, React, Astro

Databases: PostgreSQL, PostGIS, MongoDB, Supabase

Tools and DevOps: Git, GitHub, Docker, Render, Vercel

Methodologies: Scrum, Agile, REST API design, Hexagonal architecture

Soft Skills: Communication, Teamwork, Leadership, Problem solving, Continuous learning

EDUCATION

Bachelor's Degree in Systems Engineering

Universidad de Ibagué | Ibagué, Colombia | 2022 - 2027 (expected)

CERTIFICATIONS

- Scrum Master Certification - LearnQuest

- Python for Data Science, AI & Development - IBM
- Innovation & Entrepreneurship: From Design Thinking to Funding - EIT Digital

LANGUAGES

- Spanish - Native
- English - Intermediate (B1)
